Connectors – QR/P1 Series

Fig. 1 — Plug Housing

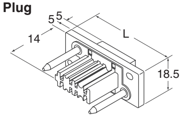

Fig. 2 — Socket Housing

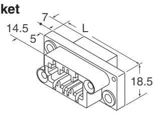

QR/P1 series connectors are small and compact high density versions of original OR/P series. Available in 8, 12, 16, 24 and 32 way. Crimps terminals assure positive and reliable termination with minimum labor. **Features:** • The coupling mechanism assures stable and reliable contact pressure through point and blade contact, in addition to smooth coupling that is sufficiently capable of dealing with variations in the coupling length specific to the plug-in connection • One opposed pair (in 12 contacts), 2 pairs (in 8, 16, and 24 contacts), and 3 pairs (in 32 contacts) can be used as power supply contacts. They are spaced further apart than the others so as to have enough creeping distance to withstand a high voltage. Fire-retardant insulation materials (UL94-0) are used. • The Guide Pin is made of steel nickel plated to be strong enough against accidental coupling shock. • The mount of a receptacle housing is done through floating bushes. Thus, they may help to give more smooth coupling of connectors by self-adjusting function. **Specifications:** • **Operating Temperature Range:** -10°C ~ 60°C • **Voltage:** *Power Terminal*: AC 250V; *Signal Terminal:* AC 125V • **Current:** *Power Unit*: 13A maximum (AWG 14 use); *Signal Unit*: 3A • **Withstand Voltage:** *Power Terminal*: AC 1000V; *Signal Terminal*: AC 500V • **Insulation Resistance:** 5000MΩ higher at DC 500V • **Contact Resistance:** *Power Unit*: 10mΩ or less at DC1A; *Signal Unit*: 15mΩ or less at DC1A • **Material:** *Insulator*: Polyethylene terephthalate, black; *Terminal*: Phosphor bronze, selective gold plating with nickel under plating

SCSI Terminators

SCSI TYPES:

Single-Ended Active:
Allows up to 5 megabytes per second. Also referred to as “Regulated” or “Boulay.” These terminators include a voltage regulator along with resistors and capacitors. They support applications requiring longer cable lengths and faster data transmission rates. • Eighteen 110Ω resistors • Three or more capacitors • Two voltage reference resistors • One voltage regulator

Differential:
Allows up to 10 megabytes per second, cable lengths up to 25 meters • Requires more powerful drivers than single-ended • Ideal impedance match, 122Ω

Force Perfect:
Use with near non-SCSI applications wherein the larger bandwidth and faster risetimes create special problems; compensates for variances by averaging the impedance mismatches through diode switching and biasing techniques. Circuitry: Thick film resistors and/or discreet components on aluminum substrate or plastic laminate

Active Negation:
Used by SCSI-2 and SCSI-3 Drivers and Receivers in single ended active applications to help ensure clean, noise-free transitions of the signals. These terminators can source as well as sink current, thereby maintaining voltage control.

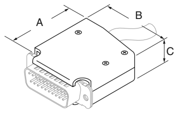
(Straight Cable Exit Shown)

Straight/90° Exit Cable Clamps can be used on a plug or receptacle and will not interfere with commonly used mating hardware. Their three-piece construction allows easy assembly to a cable harness. Also, the same cable clamp components are used for both straight and 90° cable exit applications. This is accomplished by simply positioning the Male and Female Panels on the Yoke for the desired angle. **Material:** Thermoplastic, black.

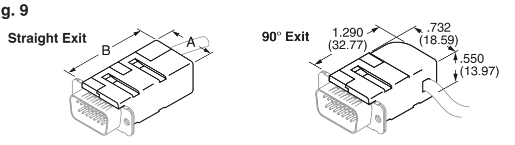
Fig. 8



Straight/45° Exit Cable Clamps can be used on either a plug or receptacle and will not interfere with commonly used hardware, such as Male Screw Retainers, Female Screw-locks or Spring Latches and Latching Blocks. Their hinged construction allows easy assembly to a harness. Also, the straight or 45° angle of the cable exit is achieved by merely positioning the Cable Support Gate for the desired angle prior to installing the assembly onto the plug or receptacle.

Material and Finish: Cable Clamp Housing: Thermoplastic, black with textured finish. **Gates:** Thermoplastic, black. **Pan Head Screw, 6-32 Set Screw and 6-32 Square Nut:** Steel, zinc plated (9 & 15 positions include self-tapping screws only).

Fig. 9



Low Profile Cable Clamps feature a two piece construction which allows the two cover halves to be snapped together, no hardware is required for assembly. They can be used on plugs or receptacles and will not interfere with commonly used mating hardware. Sufficient Cable Support Gates (or a Cable Support Latch) are supplied with each cable clamp kit to achieve adjustable clamping over a wide range of jacketed cable diameters. **Material:** Thermoplastic, black.

Note: To be used with HDE connectors only.

Water Resistant D-Sub Connectors

Electronic equipment that is used in harsh outdoor or indoor environments, require connectors that can withstand moisture, dust and other elements that cause connectors to fail. CONEC® has developed the new water resistant connector system. The water resistant connectors meet IEC 529-IP67 specifications. This series of water resistant connectors can be successfully applied in applications where moisture, high humidity, water and dust are present. CONEC applies special sealing procedures to seal the connectors.

The program is UL (E202784) and CSA (LR115000-1) approved.

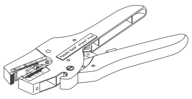
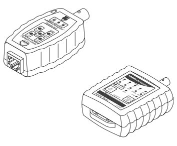
Stripax® Pro 6



LAN ProNavigator™ Test Set



Tester Data/Link ID and Cable-Check™: Tests UTP, STP and flat satin cables with RJ45 terminations. Tests both data and phone connection schemes including patch cords and installed cables to identify: • Good connections • Opens • Shorts • Cross-connections. Identifies data and link transmission speeds with real time detection: 100 MB and 10 MB. Detect PC (NIC) and HUB data transmissions and PC (NIC) and HUB NLP or FLP link pulse.

SureStrip® 4.0: High quality wire stripping and cutting tool for 20-12 AWG (0.5 ~ 4.0 mm^2) • Strips stranded and solid conductors with PVC insulation • Strips multiple conductors and thin, ribbon-cable conductors simultaneously • Built-in wire cutter • Precision self-adjusting blades prevent wire damage • Strips double-insulated cable in two work cycles • User-replaceable stripping blades • Adjustable wire stop to set strip lengths • Value stripper to prepare wire for wire and ferrule termination

Mini-Stripax® Plus: Universal wire stripper and cutter that uses changeable blades to strip PVC and Teflon® insulation. Strips PVC-insulated wire in the range of 28-18 AWG (0.80 ~ 1.0 mm^2) and Teflon-insulated wire in the range of 32-18 AWG (.032 ~ 1.00 mm^2) • Strips flexible and solid conductors with PVC, Teflon, silicone and other special insulations • Strips multiple conductors and thin ribbon-cable conductors simultaneously • Adjustable wire stop and built-in wire cutter • 28-18 AWG (0.80 ~ 1.00 mm^2) PVC blade included

Stripax® Pro 6 Strippers: The new stripax performs powerful stripping of standard and industrial insulations including PVC, THHN, THHW, silicone and polyethylene. Stripping blades are composed of 68 individual spring-compression blades to adjust precisely to the insulation. Not for Teflon or Kapton hard insulations.

LAN ProNavigator™: Two-piece tester includes main unit and remote with test results at both ends. One-button, simple testing (PASS/FAIL or fault find). Detects opens, shorts, crossed wires and split pairs. Cable types, RG58, RG59, RG6, RG6 Quad, Belden 8281, RG8, RG11, CAT-5, CAT 5e or CAT-6 (UTP/STP) cable.

10/100 Base-TX MagJacks: Multi-port shielded RJ-45 connector with integrated 10/100 magnetics. Highly integrated design conserves valuable board space. Design supports AutoMDIX applications. 50 micro-inch hard gold-plated contacts. UL 94V-0. Operating Temperature 0°C ~ 70°C.

SI Series: MagJack Modular Jacks with Integrated Magnetics. The SI Series MagJack connectors offers filtering capabilities for your high-speed network and telecom applications. By integrating the magnetics into the jack body, MagJack high-speed connectors improve your signal while saving you board space.

Note: Pin without electrical connections are omitted.

30 Series: Unshielded modular plugs offer superior performance for voice, data, and high-speed networking applications.

36 Series: Shielded modular plugs provide a highly reliable connection to jacks for high-speed networking applications. Superior shielding characteristics make the 36 Series plugs ideal for environments that require protection from EMI.

Series 37: Category 5 modular plugs are designed to provide exceptional performance in high-speed communication applications. All 37 Series plugs use electropolished, 50-microinch gold-plated contacts for the most reliable, long-lasting performance.

Series 39: The high performance modular plug for cutting edge premises wiring applications.

Series 64 and 70: These jacks provide versatile and reliable right-angle solutions for your networking applications.

Series 66: Our extensive line of single-row harmonica jacks offers shielded and unshielded solutions for twisted-pair networking environments. The contacts are fully enclosed for maximum efficiency and long life.

Series 68: SOF-LOK™ posts use metal tabs to lock the jack tightly to the board with minimum impact. The pogo-action contacts provide uniform pressure to the solder pads and absorb the shock of repeated mating cycles for maximum durability.

Series 71: Our high-performance modular jacks are designed for fast installation into high-speed applications. The industry-standard, eight-position design is an easy drop-in replacement for Category 3 jacks.

Series 73: Enhanced shielding provides optimum protection against EMI and our unique panel tabs provide high normal force for superior shielding effectiveness. The longer springs allow repeated insertions/withdrawals from a panel, and prevent "fish hooking" on the panel if overinserted. High-Performance StackJack connectors are designed for demanding Category 5 applications.

Series 80: The rugged design of our cable-ready jacks is ideal for telco, data, mobile, and coupling applications. Available with built-in strain relief.

OMRON®

Optical Communication Devices

Omron has achieved the worlds smallest size by combining Omron's Micro Lens Array with thin film filters in a proprietary structure. This minimizes costs by reducing the number of internal parts. Omron's optical switches (1 x 2 and 2 x 2) use a low power consumption with a latching function. The numbers of components are reduced using a complex prism and are able to accommodate SC type fiber optic connectors. Applications include fault response, maintenance, (OXC) Optical Cross Connect Circuit, (OADM) Optical Add/Drop Multiplex Circuit.

Omron's 4 channel and 8 channel Mux and Demux devices are SC connector compatible for transceiver and transponder applications. Using Omron's proprietary Micro Lens Array structure makes these the worlds smallest and most cost effective Mux/Demux available. Use for CWDM, LX4, B-PON, E-PON, G-PON and (OADM) Optical Add/Drop Multiplex Circuit.

Termination Kits: For AMP FSMA, and SC Style: Termination kits provide all the materials and tools (except epoxy) required to terminate a particular type of fiber optic connector. Tools are conveniently packaged in a handy carrying case. The kits contain polishing materials for approximately 60 connectors. The consumable items in the kit can be purchased separately.

Polishing (Lapping) Film Packets: Polishing film sheets are used with polishing bushings for hand polishing of fiber optic connectors. Most part numbers consist of a packet of ten 8.5" x 11.0" (21.59cm x 27.94cm) sheets. Each packet will polish between 60 and 80 connectors.

Consumables Kits: Contains all consumable supplies for at least 100 connectors. Epoxy (general purpose), polish film, epoxy applicators and polish pad.

Features: • Pre-centered adapter mount provides quick, easy focusing, and changing of connectors • Kg-3 infrared filter to protect the user • Durable, lightweight A.B.S. plastic microscope body • Lockable, high density polyethylene, double-well carrying case with antistatic foam cut-outs

Fiber Optic Multimode Switches

Low Profile Fiber Optic Switches are miniature, board mountable devices that permit the switching of an optical signal from one fiber to another. Switching is accomplished by a slight pivoting motion of a spherical mirror which reflects the optical signal to the appropriate fiber. This patented imaging technology provides very low optical loss. Fiber Optic Switches can be terminated with any fiber optic connector.

Specifications:
• **Switching Speed:** 5msec Typical • **Operating wavelength:** 750-1450nm • **Insertion loss at 1300nm:** 0.5dB Typical, 0.8dB Maximum per FOTP-34 • **Crosstalk:** -45dB Typical per FOTP-42 • **Switch Driver:** 5V at 80mA Maximum, 12V option available • **Fiber Type:** Graded Index 62.5/125 • **Lead Length:** 1 meter • **Operating Temperature Range:** -10°C ~ 65°C per FOTP-3, C2 • **Connector Style:** ST Style • **Durability:** >1 million cycles

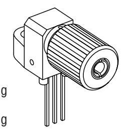
INDUSTRIAL FIBER OPTICS, INC.

Fiber Optic LEDs and Detectors



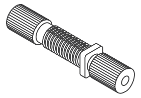
Fiber Optic family of low-cost, medium frequency, short distance fiber optic LEDs and photo detectors features: • Connector-less interface • No optical design required • Simple fiber termination and connection.

Each LED and detector consists of a PBT housing, an internal active element such as an LED or photodetector, and a cinch nut to hold the fiber in place.

The PBT housing retains the active element and the cinch nut while optimizing coupling between the active element and the jacketed 1000µm plastic fiber.

Shared Ratings: Maximum Ratings and Characteristics (T_A=25°C): Operating and Storage Temperature Range (T_{OP},T_{STG}): -40°C ~ 85°C. De-rated above 25°C: 1.33mW/°C.

Fiber Optic Connector



This multi-purpose connector is designed for jacketed 1mm core plastic fiber. It utilizes the same cinch nuts, alignment principles and no-fuss fiber terminations to quickly handle the most common requirements for joining two fibers.

END PLATES:

In general end plates are used at the end of each terminal row. If different terminals of different sizes are used on 1 terminal row, end plates are also used between these different sized terminals. The overall dimension of end plates conform to the dimension of the terminal to match.

ISOLATION PARTITIONS:

When operating with cross-connections, partition plates have to be mounted between the cross-connection. This is necessary in order to follow the prescribed air and creepage distances.

SEPARATORS:

Some terminal types are used with separators when operating them with cross-connections for to follow the prescribed air and creepage distances. Separators can be mounted subsequently between the cross-connections.

TEST-SOCKETS:

Sockets type STB are inserted in the busbar or screwed in the modular terminal in place of the terminal screw. They serve to take up the test sockets type PS.

TEST PLUGS:

Test plug type PS serve for the final testing of finished wired terminal strips.

CROSS-CONNECTION SYSTEMS:

Q - Cross connection; QI - For cross connections the cross connection bar, connection sleeve and fixing screw are already captively mounted with the corresponding number of poles.

Terminal Blocks

Micro-Pitch Terminal Blocks: The MPT 0.5 is the smallest screw terminal block available. With a micro-pitch of 2.54mm, the MPT 0.5 is ideal for high density applications.

Press Fit Terminal Blocks: The Press-Fit printed circuit board terminal block line is the perfect solution when wave soldering is not an option. The Press-Fit line is available in both fixed and pluggable styles.

Terminal Blocks *(Cont.)*

Multi-Level Terminal Blocks: With their small pitch, the two and three level MKKDS and MK3DS are ideal solutions due to the increasing packing and connection density on printed circuit boards. **Insulation Displacement Terminal Blocks:** The IDC printed circuit board terminal blocks mass terminate insulated conductors quickly without the need for tools.

Features: Secure Locking, Easy Insertion: The combination of terminal and housing provides easy mating onto the male tab. Unmating is also easy, by holding the housing while pulling, the contact lock spring is disengaged by the taper inside the housing. Should you accidentally pull the wire, the locking mechanism ensures that disengagement does not take place. **Stable Contact Performance:** The contact is designed with a large contact area to give stable performance, even when high current is applied. **Mis-Insertion Prevention Mechanism and Housing Lance:** Inside the housing is a stopper that prevents mis-insertion, which ensures that someone will not mistakenly insert a contact in the housing. **Specifications: Current Rating:** 25A AC, DC (250 + AWG 10) **Voltage Rating:** 250V AC, DC **Temperature Range:** -40°C ~ 105°C **Applicable Tab:** .187” Tab 0.5mm (.020”)/0.8mm (.031”) thick; .250” Tab 0.8mm (.031”) thick

PIDG Ring Terminals

PIDG (Pre-Insulated Diamond Grip) Terminals: Meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2. **Product Facts:** • **Temperature Rating:** 105°C maximum • **AMP Wire:** Solid or Stranded • **Terminal Material:** The basic terminal is conducted of fine grade high conductivity copper per ASTM B-152 and tin-plated per MIL-T-10727. Basic material for Spring Spade Tongue Terminals is phosphor bronze per ASTM B-139 and tin-plated per MIL-T-10727. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes. • **Copper Sleeve:** The specially designed copper sleeve, fitted over the terminal barrel, provides circumferential insulation support to the wire and allows the wire to be bent in any direction, without fraying the wire's insulation or breaking the conductor. • **Nylon Insulation (unless otherwise noted):** Nylon sleeve assures high dielectric strength.

PIDG Insulation Restricting Terminals: **Material:** • Insulation: Nylon • Terminal Body and Metallic Sleeve: Copper per ASTM B-152 • Plating: Nickel per QQ-N-290 or Tin per MIL-T-10727. Insulation Restriction Terminals prevent the insulation of thin-wall insulation wire from entering the terminal's wire crimp area during the crimping process.

PIDG Radiation Resistant: **Temp. Rating:** 150°C maximum **Material:** • Insulation: Polyvinylidene Fluoride (PVF_2) • Terminal, Splice Body & Metallic Sleeve: Copper per ASTM B-152 • Plating: Tin per MIL-T-10727

PIDG Spade Terminals

PIDG (Pre-Insulated Diamond Grip) Terminals: Meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2. **Product Facts: • Temperature Rating:** 105°C maximum **• AMP Wire:** Solid or Stranded **• Terminal Material:** The basic terminal is conducted of fine grade high conductivity copper per ASTM B-152 and tin-plated per MIL-T-10727. Basic material for Spring Spade Tongue Terminals is phosphor bronze per ASTM B-139 and tin-plated per MIL-T-10727. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes. **• Copper Sleeve:** The specially designed copper sleeve, fitted over the terminal barrel, provides circumferential insulation support to the wire and allows the wire to be bent in any direction, without fraying the wire's insulation or breaking the conductor. **• Nylon Insulation (unless otherwise noted):** Nylon sleeve assures high dielectric strength.

PIDG Knife Disconnect and Butt Splices

PIDG (Pre-Insulated Diamond Grip) Terminals: Meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2. **Product Facts:** • **Temperature Rating:** 105°C maximum • **AMP Wire:** Solid or Stranded • **Terminal Material:** The basic terminal is conducted of fine grade high conductivity copper per ASTM B-152 and tin-plated per MIL-T-10727. Basic material for Spring Spade Tongue Terminals is phosphor bronze per ASTM B-139 and tin-plated per MIL-T-10727. AMP's special plating process creates durable corrosion resistance to salt spray and most chemical fumes. • **Copper Sleeve:** The specially designed copper sleeve, fitted over the terminal barrel, provides circumferential insulation support to the wire and allows the wire to be bent in any direction, without fraying the wire's insulation or breaking the conductor. • **Nylon Insulation (unless otherwise noted):** Nylon sleeve assures high dielectric strength.

PIDG - Spare Wire Caps: Material: Copper Tin Plated, Insulation: Nylon

PIDG - Butt Splice Step Down Adapter Inserts:
Material: • Adapter Body: Copper per ASTM B-152 • Plating: Zinc/DyeChromate

PT with Solder Contacts (MIL-C-26482 Series 1 Type)

Aluminum shell components: Standard olive drab, electrically conductive cadmium plated. Dependable 5 key/keyway polarization with bayonet lock coupling assures positive mating. Spring tension provided by a wave washer in the coupling nut ensures maintenance of interfacial seal between mating halves. Insert and main joint gasket molded from resilient neoprene.

Solder contacts are installed. Pins and sockets are copper alloy/gold plated.

PT solder series is UL recognized under file #E115497, Section 5

Circular Bayonet Lock Connectors *(Cont.)*

NEW! PT with Solder Contacts (MIL-C-26482 Series 1 Type)

RoHS COMPLIANT

Aluminum shell components: Non-conductive black zinc cobalt plated. Dependable 5 key/keyway polarization with bayonet lock coupling assures positive mating. Spring tension provided by a wave washer in the coupling nut ensures maintenance of interfacial seal between mating halves. Insert and main joint gasket molded from resilient neoprene.

Solder contacts are installed. Pins and sockets are copper alloy/gold plated.

PT solder series is UL recognized under file #E115497, Section 5

Circular Bayonet Lock Connectors *(Cont.)*

PT-SE with Crimp Contacts (MIL-C-26482 Series 1 Type)

Aluminum shell components: Standard olive drab, electrically conductive cadmium plated. Dependable 5 key/keyway polarization with bayonet lock coupling assures positive mating. Spring tension provided by a wave washer in the coupling nut ensures maintenance of interfacial seal between mating halves. Insert and main joint gasket molded from resilient neoprene.

Crimp contacts are included, but not installed. (See Astro Tool Corp. hand crimping tools and contact installation/removal tools). Pins and sockets are copper alloy/gold plated.

Field Installable Connectors

Conxall was an innovator in the design of all plastic cylindrical connectors. The all plastic connector provides for substantial savings in cost without sacrificing performance and quality.

The all plastic connector is corrosion resistant, non-conductive and withstands substantial abuse, hostile environments, and heavy impacts that would otherwise cause metal connectors to corrode, deform or become electrically conductive and thus become unusable or unsafe.

Specifications: • Voltage: 600V • Temperature Rating: -55°C ~ 125°C (-67°F ~ 257°F) • Contacts: Brass, gold over nickel • Watertight: NEMA 6P, 13: IEC IP67 • UL Recognized: File #E138878 - 250V • CSA Certified: File #LR89277 - 600V

FAKRA and FAKRA II SMB Connectors

RoHS COMPLIANT

With recent advancements in communications technology and increased consumer demand for a diverse array of on-board telematics services, RF communications systems have become indispensable components of the modern automobile. To keep RF interconnection costs low and ensure high levels of electrical and mechanical performance the German and American automotive industries have standardized a high-performing, cost-effective RF connector based on the FAKRA and USCAR standards. Utilizing a standard metal SMB connector embedded within a plastic housing that can be designed with multiple colored codes for easy identification, FAKRA connectors are designed to perform up to 4GHz and meet the particular mechanical and environmental requirements of the automobile industry. **FEATURES: Electrical:** • Impedance: 50Ω • Frequency Range: DC-4GHz • Performance Specification: SAE/USCAR-17 • Insulation Resistance: 1000MΩ minimum • Center Contact Resistance: center contact <20mΩ; outer contact <10mΩ • Dielectric Withstanding Voltage (sea level): >1000VRMS **Mechanical:** • Durability (matings): 100 minimum • Plastic Housing Engagement Force: ≤20 N • Plastic Housing Disengagement Force: ≥25 N • Coding: 13 mechanical and colored codings • Plastic Housing: PBT with 15% Glass Fiber • Secondary Locking Clip: PBT with 15% Glass Fiber • Center Contact (female): Beryllium Copper; (male): Brass • Body: Brass • Barrel: Brass • Retainer Ring: Beryllium Copper • Ferrule: Copper • Insulator: TFE • Center Contact Plating: Gold • Body, Barrel and Ferrule Plating: Nickel. FAKRA connectors incorporate machined components. FAKRA II connector series utilizes die cast as well as stamped and formed components.

QMA Connector Series

RoHS COMPLIANT

The QMA connector is a quick disconnect version of the SMA connector and shares the same internal construction, which allows the connector to have excellent performance. Because of the innovative coupling mechanism, a 360-degree butt joint is maintained which results in low RF leakage. Since the RF line is identical to the SMA series. QMA connectors also offer the same high power handling capability. This give the series significant advantages over other quick disconnect connectors, although QMA and SMA are not intermatable. Typically, these connectors can be installed into a system 10 times faster than an SMA connector. Another benefit of eliminating the threaded coupling is the denser packaging.

SPECIFICATIONS:

Electrical: • Impedance: 50Ω • Frequency Range: DC – 6GHz • Return Loss: DC – 3GHz > 32dB, 3 – 6GHz > 25dB

Mechanical: • Engagement Force: 5.6 lbs (25 N) • Disengagement Force: 4.5 lbs (20 N) • Retention Force for Interface: ≥ 13.5 lbs (60 N) • Mating Cycles: 100

Environmental: Temperature Range: -65°C ~ 165°C
